

Mobile Banking Release June 2018

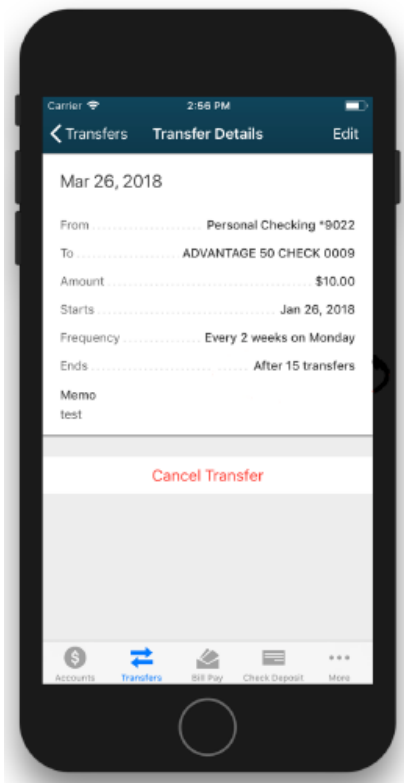

Please update your app in the Apple App Store to version 5.9 in order for the following new feature to be available on your device. Although our targeted live date is scheduled for June 12, 2018, the Apple App Store may be delayed in allowing version 5.9 to be immediately available, so it may take a few days to fully implement version 5.9.

GENERAL ENHANCEMENTS

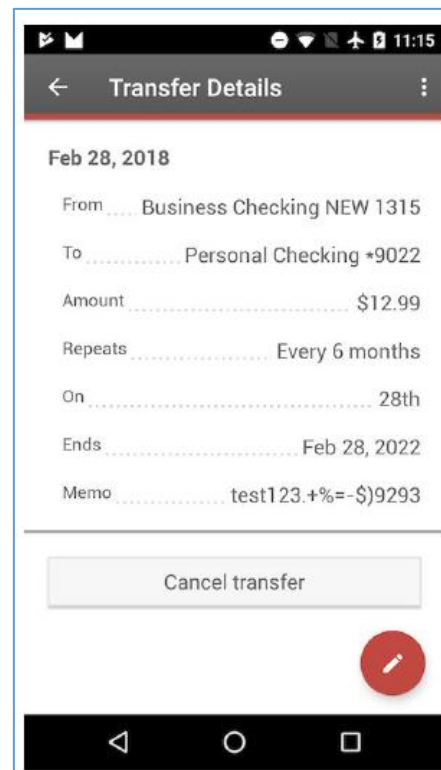

View Details for Scheduled Recurring Transfers

You will now be able to view the details of the scheduled recurring transfer by tapping the list of transfers. Also, on this screen, option to cancel or edit the transfer will be provided.

iOS

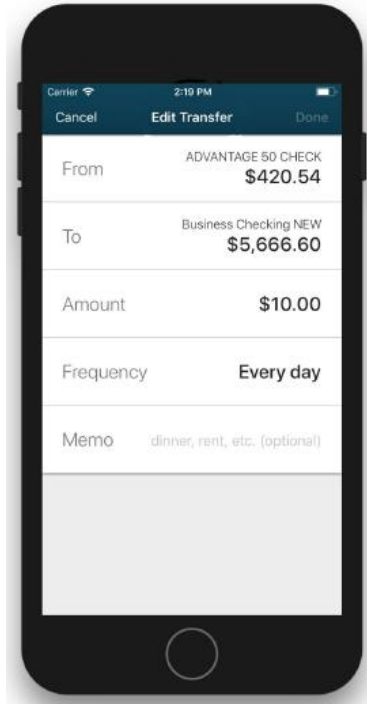

Android

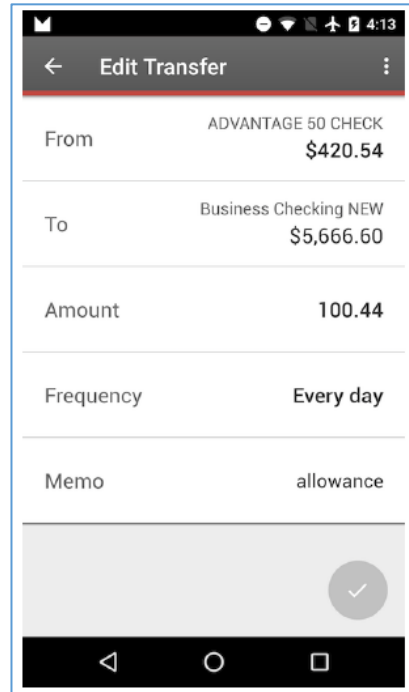

Details for Scheduled Recurring Transfers

You will now be able to edit any of the characteristics of the scheduled recurring transfer. To edit on iOS, you have to tap "Edit" from the prior screen. On Android, you tap the floating action button to bring up the flow.

iOS

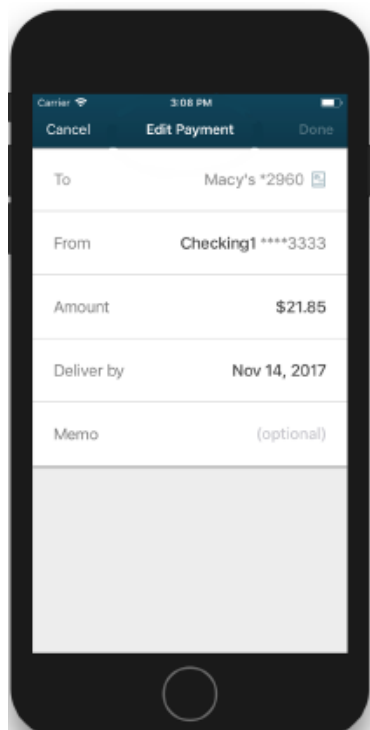

Android

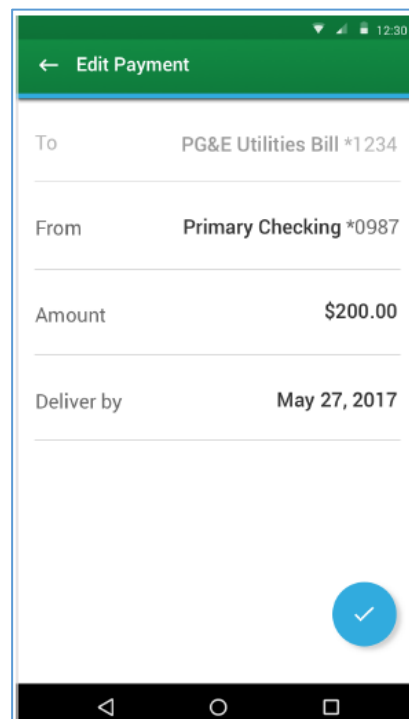

Edit Bill Payment

You will be able to edit all of the parameters of a scheduled bill payment until the payment is pending. Tapping on any scheduled payments will allow you the option to Edit/Delete a payment.

iOS

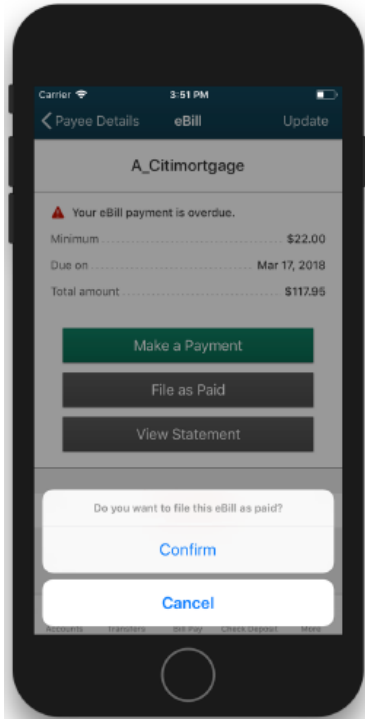

Android

File eBill as Paid

For those eBills that you have made payments directly to the merchant, you can mark it “filed” (“paid”) through your mobile banking app. When you are on the eBill page, you can use “File as Paid” to move the eBill series forward and remove the notification.
