

Mobile Banking Release April 2018

Please update your app in the Apple App Store to version 5.8 in order for the following new feature to be available on your device. Although our targeted live date is scheduled for April 17, 2018, the Apple App Store may be delayed in allowing version 5.8 to be immediately available, so it may take a few days to fully implement version 5.8.

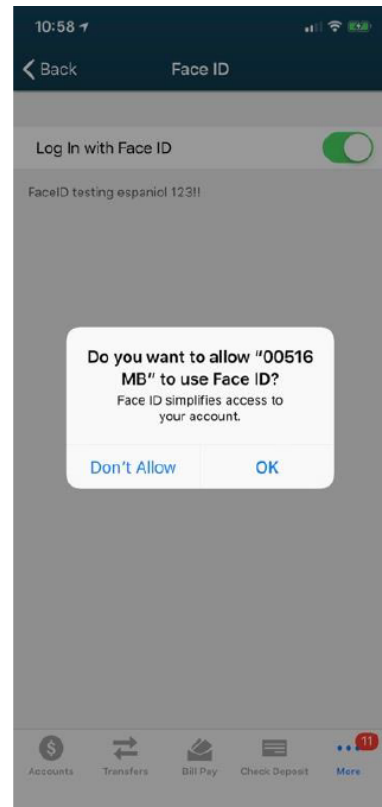

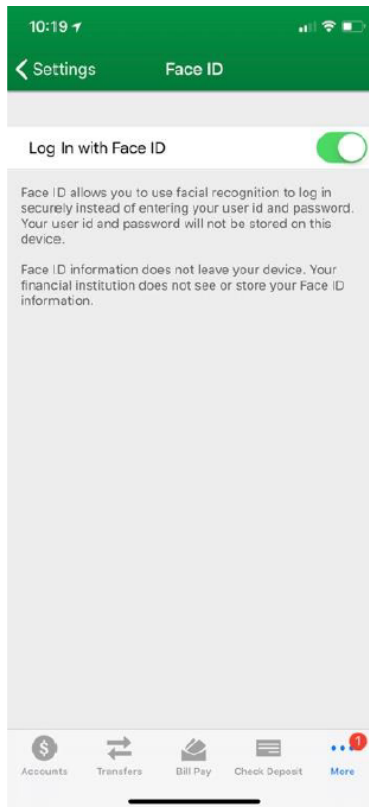

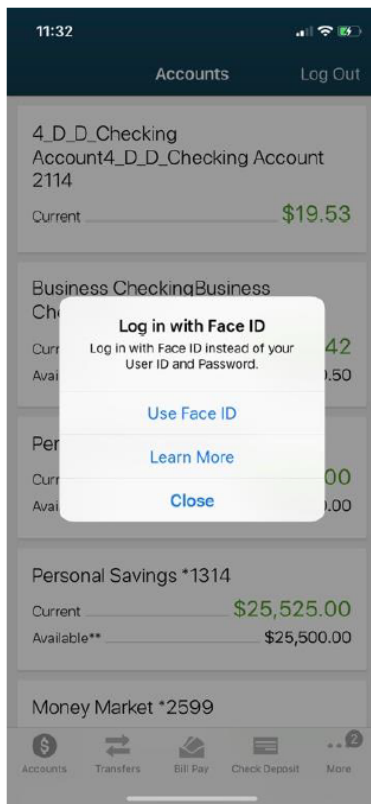

iOS ENHANCEMENTS

Face ID – iOS Devices

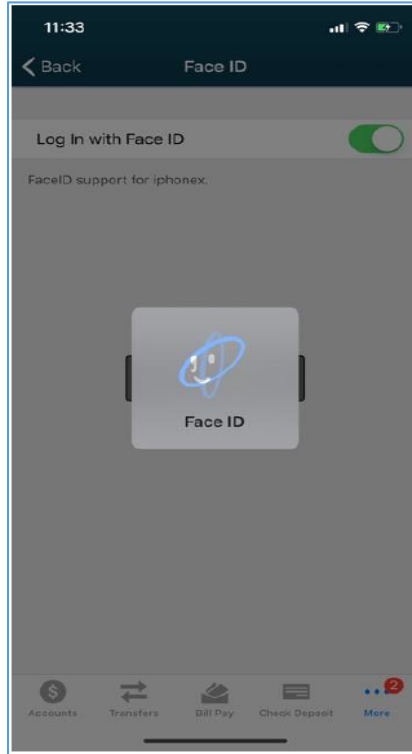

Mobile Banking Release 5.8 brings a Face ID specific user interface to the iOS app. Much of the behavior mimics the existing approach with Touch ID. Only devices that support Face ID will see this interface.

If you have a new device and have not logged in previously, will be prompted to enroll in Face ID. This will take you to a Face ID specific setting page. They will be able to turn on Face ID from this page. Going forward, you will now be able to use Face ID to log into the Mobile Banking app.

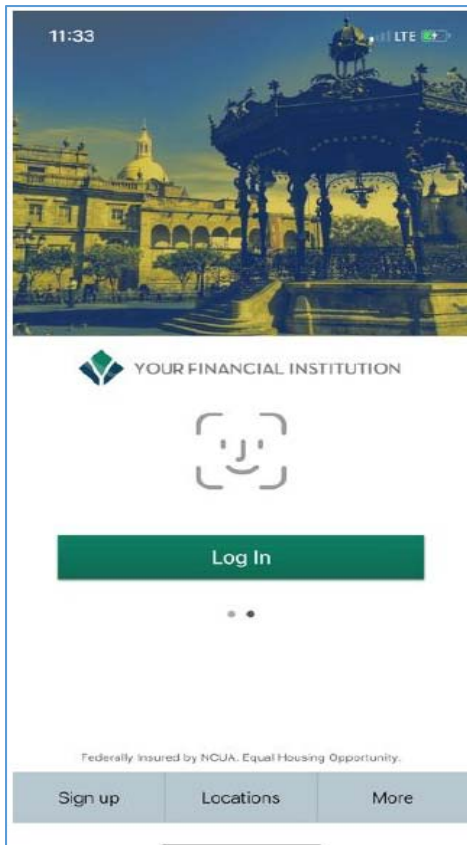

The flow from logging into the app, tapping on Use Face ID or Learn More, then enabling the feature:

Last enablement screen of Face ID:

Face ID Login Page – This will be the preferred login option for you if you last used it to log in with:

NOTE: this is a generic screen shot, the actual login page will display our bank information.
